Diagram illustrating the merge operation in Rmd files:

- Three source files (A, B, C) are merged into a target file (D).
- The source files are represented by colored squares (green, grey, white) and the target file by a single green square.
- A large arrow points from the source files to the target file.
- The text "share = T" is on the left.
- A box on the right contains the code: `_web.yml`, `rmdfiles: [A, B, C]`, `mergedRmd: D`.
